

City of Rivergrove OR

Ordinance No. 89-2018

Native Tree List

April 28, 2020

As noted in (F. 1.) of the Ordinance, the type of trees to be planted in mitigation shall be determined on a case by case basis with review and comment by the City Arborist. Per Ordinance section (F. 4.), it is highly recommended (not required) that mitigation trees be chosen from the Native Tree List, particularly in WQRA or Flood Hazard areas. The Approved Tree List may also be used for alternate tree choices for those areas. NON-WQRA or areas not in Flood Hazard Areas may use this Native Tree List or the Approved Tree List.

For more detailed tree information, please refer to the Oregon State University Department of Horticulture website for Landscape Plants at: <https://landscapeplants.oregonstate.edu/common> The site contains images and information on over 1,800 landscape plants.

Native Evergreen Trees:

COMMON NAME

Grand fir
Pacific madrone
Incense Cedar *
Ponderosa pine
Western White Pine
Douglas-fir
Pacific yew
Western hemlock
Western red cedar *

BOTANICAL NAME

Abies grandis
Arbutus menziesii
