Ordinance No. 89-2018

Approved Tree List

April 28, 2020

As noted in (F. 1.) of the Ordinance, the type of trees to be planted in mitigation shall be determined on a case by case basis with review and comment by the City Arborist. Per Ordinance section (F. 4.), it is highly recommended (not required) that mitigation trees be chosen from the Native Tree List, particularly in WQRA or Flood Hazard areas. This list of Approved Trees may also be used for alternate tree choices for those areas. NON-WQRA or areas not in Flood Hazard Areas may use this Approved Tree List or the Native Tree List.

For more detailed tree selection information, please refer to the Oregon State University Department of Horticulture website for Landscape Plants at: <https://landscapeplants.oregonstate.edu/common> The site contains images and information on over 1,800 landscape plants.
